Heroes of Hygiene

Greetings to all of our Heroes of Hygiene. Did you know that Oct. 15th is Global Handwashing Day? That's because handwashing is like a 'do-it-yourself' vaccine. It is the simplest and best way to remove germs, avoid getting sick, and prevent the spread of disease. So, every time someone soaps up their hands—hygiene wins, and the germs lose. And that's good news for everyone.

In the Ambassador program we talk about the importance of being an advocate. An advocate is someone who finds people in need and then works to meet those needs. There are many people here in Utah and around the world that don't have access to basic hygiene items like soap. They need our help!

We hope you will accept the invitation to become their advocates—their Heroes of Hygiene as you work generously to meet their needs. The holiday donation drive began yesterday on NOVEMBER 30th and will continue through December 15th. Go APA!
